New Donkey Kong Game for Intellivision?

In Issue #8 of Video Game Trader, Patrick Wong wrote about Donkey Kong and was wondering what a properly programmed version of Donkey Kong would look like on a classic console. Well, thanks for one of our readers (Michael Hayes) we might have an answer, thanks to Carl Mueller Jr.

Carl has created a homebrew version of Donkey Kong that includes all four levels and is very faithful to the arcade version.

Here is what Carl has to say about his version.

*"For my first Intellivision game, I decided to see if I could make a version of Donkey Kong **superior** to the one released by **Coleco** in 1982. In order to make the translation as **faithful as possible**, I **reverse-engineered the arcade's ROM**. My first version used the Intellivision's built-in operating system, known as the **EXEC** (which I had also **reverse-engineered and documented** well enough to write my own game). I soon found, however, that the **EXEC** could not produce graphics as smoothly or as detailed as I required (without synchronization issues), so I decided to **roll my own graphics engine**. The end result is a translation that **reproduces precisely the physics, control, and enemy AI of the arcade**. Although unfinished, the current version includes **all four boards**, and is entirely playable with sound effects and music.*

Pie Factory. Not included in any other home version.

Advertisers Now Getting into Video Games

In the video game *Cool Boarders 3*, the characters swoosh past Butterfinger candy bar banners, riding Burton snowboards and wearing Levi's jeans while attempting to beat opponents' times recorded on Swatch watches.

In NFL GameDay 99, Minnesota Vikings wide receiver Cris Carter can haul in a touchdown pass in front of a banner for Upper Deck trading cards.

And in the *X-Files* computer game, agents Scully and Mulder track down aliens with the help of the latest Nokia cellular phone.

Video and computer gamemakers aren't just trying to make the games look realistic; in some cases, they're selling advertising space.

This advertising scheme -- paying for product placement -- already has invaded movies and television shows. Now, it's becoming more common in electronic games as advertisers try to reach teens and twentysomethings who are spending less time watching TV and more time playing games.

"The day we released *Cool Boarders 3*, sponsors were lining up saying, 'How do we get into *Cool Boarders 4*?' " said Jeff Fox, vice president of marketing for 989 Studios, a Foster City computer gamemaker.

In a few cases, companies actually pay video gamemakers to showcase their products or logos. More often, the companies enter cross-promotional deals.

For example, Psygnosis of Foster City released a game last year for the Sony PlayStation and the PC titled *G-Police* in which characters wear Diesel apparel. Diesel, in turn, marketed *G-Police* jackets and had in-store kiosks where people could play the game.

Brand names have been showing up in electronic games, especially sports-related ones, for years to add a touch of realism. In the past, however, gamemakers had to beg well-known companies to use their logos and sometimes even pay them.

Now the tables are turning as companies see games as a new advertising medium.

"We're moving away from the big-bang, big-budget media and are trying to talk to the consumer more directly," said

Barth Ballard, digital marketing manager for San Francisco's Levi Strauss.

Several factors are catching advertisers' eyes.

First, sales of computer and video games in North America were projected to hit \$6.3 billion in 1998, a 32 percent increase from 1997, according to the marketing research firm NPD Group of Port Washington, N.Y. More than 20 million PlayStation and Nintendo 64 game consoles alone were in U.S. homes, NPD said.

Electronic games have become the fastest-growing segment of the entertainment industry, according to the industry trade group Interactive Digital Software Association.

Second, game graphics have become so good that company logos and products now can be faithfully

reproduced.

For example, Psygnosis released a Sony PlayStation game in November called *Psybadek* in which the main characters are decked out in shoes and athletic wear from Vans Inc., a Southern California sportswear company. The resolution is so good, you can even make out a tiny Vans logo on a shoe.

Last summer, Nokia Corp. wanted to substitute its latest-model cellular phone for an older one used in the *X-Files* game, figuring that players would be able to read the model number. Gamemaker Fox Interactive held up production for a few days so that it could make the switch.

Third, the demographics of video game users are appealing to certain advertisers. Most are males ages 12 to 35 who don't spend a lot of time with traditional media. Certain games, such as snowboarding or jet skiing, appeal to fans of extreme sports -- just the type of customer that companies like Burton Snowboards, Diesel and Nokia are trying to reach.

Unlike product placements in movies, which usually are seen just once, placements in video games can provide more impressions because they are played over and over, said David Cole, president of DFC Intelligence, a computer-game industry magazine in San Diego.

Of course, even multiple impressions on a video game can't match the exposure on a network television show like "*Seinfeld*," which was famous for product placements. About 108 million viewers watched the last episode of "*Seinfeld*," while a video game is considered a big hit if it sells about 200,000 units.

But the potential is there, especially with advertisers changing how they allocate their marketing dollars.

"Product placement used to be a tiny part of the mix, but now it is a very big part of the mix, and it's only natural for it to go forward into video games," said Dabney Day, president of Catalyst Corp. of Burbank, a marketing firm that specializes in product placement.

A report by the U.S. Chamber of Commerce said companies like Catalyst charge clients \$500 to \$20,000 a year for help in getting product placements.

Cole and other game industry experts don't expect product placement to become a primary source of income for game companies but said it eventually may help offset production costs.

Fox of 989 Studios declined to say how much his company has received for product placements, but an executive for a competing gamemaker who did not want to be identified said he has been told by advertisers that 989 Studios has been seeking fees between \$5,000 to \$50,000 per product placement.

Still, there are drawbacks to charging for product placement in games.

Stan Roach, an executive vice president with Accolade Inc. of San Jose, said doing so could tempt gamemakers to cross the line between realism and the crass commercialism that would be a turn off to players.

"Product placement is not an end to itself," Roach said. "You put (products) in there to extend the fantasy, so people will like your product and buy more. The moment you take your eye off that and get greedy, it can backfire."

Also, ads don't make sense in certain games, especially science fiction and fantasy titles. Players would recoil if they saw Link, the hero in Nintendo's best selling Legend of Zelda game series, stop to sip a Coke.

On the flip side, a company like Levi's would be loathe to have its products show up in a violent or risqué game.

Still, Day expects more real-world products to show up in the virtual world.

"We live in a world of brands," Day said. "We don't live in a world of generics. I'm not a believer in gratuitous product placement. But if a kid is bouncing a basketball in a video game, to us it makes sense that it should be a Spalding basketball."

Atari Games Gets Zapped by Nintendo Countersuit

Video games giant Nintendo of America zapped Atari Games Thursday with a countersuit designed to stop the smaller company from making games for the popular Nintendo system.

The suit, filed in federal district court in San Francisco, is the latest shot fired in a heated battle for sales in the \$2-billion video game market, now dominated by Nintendo.

The battle started when Atari Games sued Nintendo for \$100 million in damages two weeks before Christmas. Atari Games charged the Japanese company with monopolizing the market because Nintendo's video game system accepts only special game cartridges made by Nintendo.

Atari Games, under a licensing agreement, has produced games for Nintendo using the Nintendo cartridges. But Atari Games claims that it has suffered from \$30 million to \$35 million in lost sales because Nintendo wouldn't sell it enough of the special cartridges for its Pac-Man, RBI Baseball and Gauntlet games.

Nintendo has said that it restricts supply of its special cartridges to control game quality and to prevent a glut of video games. On Thursday,

Howard Lincoln, Nintendo senior vice president, added that Nintendo allocated its special cartridges fairly to all its licensees, and said that a shortage of computer chips restricted supplies.

Nintendo's suit against Atari Games cites the smaller company's claim that it developed a game cartridge compatible with the Nintendo system and that it plans to market four new, unlicensed games. In the suit, Nintendo accuses its former licensee of violating their contract, violating state and federal copyright laws and unfair competition. Nintendo also revoked its licensing agreement with Atari Games.

A spokesman for Atari Games, which is not related to computer maker Atari Corp., said the company couldn't comment on the suit because it had not received it.

The David-and-Goliath battle between the video game companies has attracted a good deal of attention in the industry.

"It's important," said Chris Garske, general manager for Activision Video Games in Menlo Park, which makes games under license for Nintendo. "Everyone in the industry is watching it closely."

A victory for Atari Games would mean that software makers are free to make as many games as they want for the Nintendo system, said David Morse, president of Epyx Inc., a Redwood City, Calif., software firm. "Right now, Nintendo tells everyone how many games they can make and how much profit they can make," he said.

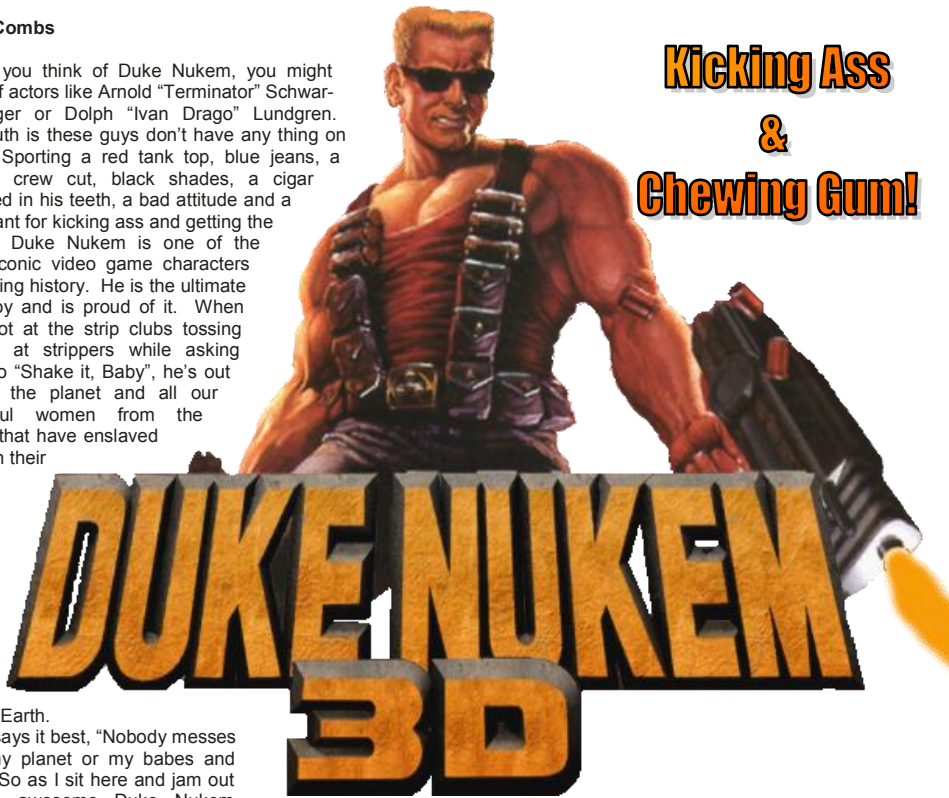

However, some believe an Atari victory could also lead to a glut of games and price cutting, conditions that precipitated the collapse of the video game market in 1984. "It's probably better for the industry if Nintendo wins, although (software makers) might make more money in the short run if Atari wins," Morse said.

When you think of Duke Nukem, you might think of actors like Arnold "Terminator" Schwarzenegger or Dolph "Ivan Drago" Lundgren. The truth is these guys don't have anything on Duke. Sporting a red tank top, blue jeans, a blonde crew cut, black shades, a cigar clutched in his teeth, a bad attitude and a penchant for kicking ass and getting the babes, Duke Nukem is one of the most iconic video game characters in gaming history. He is the ultimate bad boy and is proud of it. When he's not at the strip clubs tossing money at strippers while asking them to "Shake it, Baby", he's out saving the planet and all our beautiful women from the aliens that have enslaved them in their

planet Earth.

Duke says it best, "Nobody messes with my planet or my babes and lives". So as I sit here and jam out to the awesome Duke Nukem theme, join me as we take a look back on the origins of Duke's adventures, what he's done since and where his adventures in alien ass kicking will take him in the future.

Created by 3D Realms Designers Todd Replogle, Allen Blum, Scott Miller and George Broussard, Duke Nukem hit computers in July of 1991. Game developer Apogee, A.K.A. 3D Realms, released Duke's first go around which was simply titled "Duke Nukem". It is interesting to note that Apogee originally wanted to spell "Nukum" with an "E" but decided to go with a "U" instead to avoid copyright infringements. A radioactive mutant villain already named "Duke Nukem" existed in the environmentally conscious cartoon "Captain Planet and the Planeteers". It wasn't until later that Apogee found out that the name was not copyrighted, so right away they registered the name and the game's title was changed to "Duke Nukem" as originally intended by the creators.

Contrary to what many gamers assume, the first "Duke Nukem" was a side scrolling action platform game for MS-DOS and not the 1996 first-person shooter smash "Duke Nukem 3-D". In the first title, a lot of Duke's attitude and personality that we have come to love is experienced through text-based dialogue. The game took place in 1997 (or "the near future" back in '91) and the world is on the brink of destruction when madman Dr. Proton wants to take it over with his militias of Techbots. The CIA hired the one man that was best suited for this job: Duke Nukem, baby! His mission was to track down Dr. Proton and put an end to his chaos and madness. The game then broke up into three episodes: the first episode took place in an apocalyptic LA, the second episode at a top secret Moonbase and in the third and

final episode Duke had to travel through time to put an end to Dr. Proton once and for all. The premise of the game was to blow the heck out of enemies and make your way to the level exit, at which point the player could receive up to seven 10,000-point bonuses. Obtaining those bonuses depended on how many achievements they accomplished during their mission such as shooting out surveillance cameras and finding hidden areas.

The follow up to "Duke Nukem" was released in December of 1993 as "Duke Nukem II", with the "Nukum" name fully copywrited by Apogee. In this adventure, our kick ass ladies man finds himself kidnapped by the evil Rigelatins during an interview promoting his new Auto Biography, "Why I'm So Great". Once abducted, the Rigelatins had plans to take over Duke's brain to force him to aid them in attacking the Earth. However, their plans were foiled when Duke escapes and decides to dish out some payback. This time around there were four episodes to venture through featuring the same side scrolling game play from Duke's first outing. We get to see even more of Duke's attitude but the language had been toned down. Words like "Ass" were replaced with words like "Butt". After "Duke Nukem II", our hero would not be seen again for another three years.

It wasn't till 1996 when Duke Nukem really caught on and got the props he deserved when "Duke Nukem 3D" was released, which revolutionized the first person shooter genre. While returning home from battling in space, Duke's space ship is shot out of the sky by Alien invaders who had been taking over the Earth and enslaving all earth's babes for their entertainment while Duke was away. After the crash, Duke finds himself in a

post-apocalyptic Los Angeles where he is immediately attacked by Alien hordes. Not happy one bit, Duke takes action to defeat the aliens and rescue the babes. "Duke Nukem 3D" consists of twenty eight levels set within three chapters, with awesome and entertaining cut scenes in between along with some puzzle solving and countless hidden areas and items strewn through out the game. Months after "Duke 3D"'s release an expansion pack was released called "The Plutonium Pak", a.k.a. "The Atomic Edition" (which was a full retail release of the original "Duke 3D" with the expansion). This gave gamers a new fourth chapter containing eleven additional levels as well as new enemies and weapons. Over the years, several other expansions and add-on's were released including: "Eduke", "Duke Caribbean: Life's a Beach", "Duke it Out in DC", "Duke: Nuclear Winter", "Duke Extreme" and "Duke! Zone 1 and II."

Speaking of weapons, "Duke 3D" featured some of the coolest intuitive weapons possibly ever seen. The Shrinker Gun allows you to blast your enemy and shrink them down in size so you can stomp on them like a helpless bug, complete with gore and squishy guts sound effects. Another interesting weapon was the Freeze Ray, which freezes your opponent in a ball of ice. The popular Pipe Bombs could be thrown towards targets and either detonated immediately or be saved by reequipping the item, allowing the player to throw even more bombs to create explosions in multiple areas. Complimenting the weapons were items such as the "Holo-Duke" (which created a 3D replica of Duke for enemies to attack), steroids to speed Duke up for a limited time and the famous jet pack which allowed Duke to hover about the levels.

To help solidify Duke's bad boy persona, 3D Realms wanted Duke to have a gruffy voice similar to that of Clint Eastwood. "Duke Nukem 3D" marked the debut of the infamous Jon St. John, who has voiced Duke since and gave us all those many memorable lines that we couldn't wait to repeat to some one at a bar. "Come get some", "I'll rip

the game "Quake", which was delayed for a while around "Duke Nukem 3D"'s release.

The release of "Duke 3D" had also caused quite a controversy with not only its gore factor but with the pornographic themes through out the game. Actions like paying strippers to put on a show for you and in return they would open up their tops to shake their tasseled breasts like something out of the movie "Show Girls". Through-out the game one could find XXX posters, a pornographic theater and a porno store that had "peeping" booths in the back of the building. Because of the sexual themes and violence, "Duke 3D" was banned in some countries while others had forced 3D Realms to ship the product with the parental controls permanently turned on.

Making a leap from PC to home consoles in 1997, "Duke Nukem 3D" could be found on different platforms. "Duke Nukem Total Meltdown" for the Sony Playstation featured additional content, new enemies and a boss not found in the PC counter part. The Sega Saturn port utilized the Sega Netlink for online gaming and included a special hidden mini game called "Death Tank Zwei". "Duke Nukem 64", a toned down version on the Nintendo 64, featured four player split screen play. A handheld version was also released on Tiger Electronic's handheld gaming machine Game.com. With the success of "Duke Nukem 3D", it was safe to say Duke was here to stay and he quickly became a house hold name in action gaming for many years to come.

In 1998 the world was introduced to Duke's newest ass kicking adventure: "Duke Nukem Time to Kill" for the Sony Playstation. "D.N.T.T.K." marked the series debut into the third person action genre with a feel and control scheme similar to the game "Tomb Raider". With positive feedback on "D.N.T.T.K.", 3D Realms stuck to this formula and released "Duke Nukem: Zero Hour" in 1999, Duke's second outing on the Nintendo 64. This time the Earth Defense Force calls upon Duke to save the day once again from aliens. 3D Realms had put together a cool TV commercial for Zero Hour, which featured a live actor portraying Duke. So far that was the closest Duke fans have ever gotten to a movie.

"Duke Nukem Land of the Babes" (originally titled "Planet of the Babes" but was changed because of it's title similarity to Planet of the Apes) was released in 2000. This time Duke is at his favorite strip joint called "Booty Licious", kicking back and drinking a cold one with hot stripper babes surrounding him when aliens come through a time warp portal and crash Duke's party. The Earth Defense Force then sends one of their agents through the portal to call upon Duke to save all the babes that are being enslaved by the aliens and repopulate the humane race. That's right, repopulate the human race...

2002 saw the release of "Duke Nukem: the Manhattan Project" for Windows which hearkens back to Duke's early days of platforming. In this game, a Mad Scientist by the name of Mech Morphix (who is similar to that of Dr. Proton from the original "Duke Nukem") wants to take control of Manhattan by releasing a mutating slime called G.L.O.P.P (Gluon Liquid Omega-Phased Plasma) upon New York City, turning any creature into a killer monster. "The Mahattan Project" was built with the Prism 3D Engine, which gave gamers a more three-dimensional side scrolling experience compared to some of Duke's previous third-person adventures.

(Continued on page 10)

off your head and sh*t down your neck" are just a couple of the classic lines. Of course, some of the most famous lines everyone knows are "Hail to the King baby!" and "It's time to kick ass and chew bubblegum... and I'm all out of gum" (an homage to the 1988 cult-classic film "They Live"). A little bit of trivia, the line "What are you waiting for, Christmas?" that Duke delivers is a nod to

(Continued from page 9 (Duke Nukem))

Duke also had several hand held gaming ventures. This includes "Duke Nukem 3D" for the Game.com in 1997 and "Duke Nukem" for the Game Boy Color in 1999. Duke also had an all-new original first person action title on the Game Boy Advanced called "Duke Nukem Advanced", which was released in 2002. A mobile phone and Tapwave Zodiac version of Duke was released in 2004 called "Duke Nukem Mobile".

Now we come to the infamous "Duke Nukem Forever", which has gone down in history as one of the most delayed games ever as it has been in development since April of 1997. Over the years there have been several announcements of "Duke Nukem Forever"'s release, including footage and trailers at E3 1998 and 2001. However all of that footage has since been pulled as it no longer represents the actual game play or engine. With all the delays and fan requests for a street date, 3D Realms has simply responded by saying, "When it's finished". As of today, "DNF" is on track for a 2009 release and the most current trailer for it was released back in December 2007. Another good sign of development is actual game play footage that 3D Realms showed on "The Jace Hall Show" back on June 5th of 2008. Being directed by George Broussard, one of the original creators of Duke Nukem, you can be sure "DNF" will capture all of the essence and flavor from past Duke games that made him the action hero we all love so much today. Story and game play details are still a little fuzzy but it's totally gonna be worth the wait and none other than Jon St. John is returning to voice Duke.

Merchandising has also been a big part of the Duke Nukem legacy. A bad ass killer album was released in 1999 titled "Duke Nukem: Music to Score By" featuring such bands as Xzibit, Zebrahead, the Beatnuts, Wu-Tang Clan and the memorable Duke Nukem Theme song performed by Megadeth. 'Nuff said. T-shirts, hats,

action figures, beverage coasters, mouse pads and more were also available. The line of highly detailed action figures featured the characters from "Duke Nukem 3D" including: Pig Cops, The Octobrain and Duke himself, baby.

As for the future of Duke: you better put on some dark shades because things are looking very bright. In 2009 Apogee will bring us an all-new trilogy for the Nintendo DS tentatively titled "Critical Mass", "Chain Reaction" and "Proving Grounds". Also, fans should be excited to know that in a recent interview, 3D Realms has reported that "Duke Nukem Forever" is coming along very nicely. If you haven't yet, be sure to check out the official kick ass Duke Nukem Forever trailer on 3D Realms' site.

In the mean time, to hold you over until 2009 rolls around: if your Xbox 360 is online and you are an FPS and Duke junkie then it's time to buy some Microsoft Points because 3D Realms recently released "Duke Nukem 3D" on the XBLA service for 800 Points. In Live Arcade version you can now duke it out (no pun intended) in Co-Op and Duke Match modes with up to 8 players. You will also be able to record your game play and share it with other Xbox Live Users on the Leader boards. And for "Extra Features" nuts like myself, you will be able to unlock items like cool concept art. If you complete all the achievements, the complete art gallery is unlocked and fans are treated to two awesome official pictures of "Duke Nukem Forever". In an effort to make the game more accessible, you can also rewind time (up to a total of 10 minutes) when you die so you can tackle what killed you in a different way.

Duke is one of those iconic characters that women want and men want to play like. He's got it all: the attitude, the coolness, the looks and oh yeah... the babes. Now that "DNF" is coming back into the picture, people are starting to hail to the King once again. Duke is back, baby, and ready to kick some more ass and chew more bubble gum... and he's still all out gum.

- Brandon Cobb, president of Super Fighter Team

Welcome to Video Game Traders exclusive inside look at the brand new Sega Genesis RPG due to be released early 2009.

Upon completing Beggar Prince and releasing it to happy customers the world over, I wanted to make sure our next project at Super Fighter Team would be just as fun, just as quirky and as much of a pleasure to work with. Choosing a game to put my own personal stamp on is never easy. Everything has to feel right, and be in tune with my own sense of creativity and originality. I couldn't have had better luck, running across Legend of Wukong. It was just the follow-up experience I was looking for.

The Taiwan original came highly recommended to me by our Beggar Prince script programmer, Derrick Sobodash. When my schedule had settled a bit I decided to buy it and see what it was all about. Upon its arrival I was greeted by the game's cast:

Wukong, a young student.

Piggy, a strongman detached from society because of his looks.

Wujing, a pretty girl scarred by a family tragedy.

I knew the story was based loosely on the Chinese tale of the Journey to the West, but the developers had purposely injected their own radically different concepts in order to give gamers a fresh, unpredictable experi-

ence. This was a great choice, especially in the case of the main character: A monkey faced boy from Taiwan, Wukong is accidentally shuttled back to ancient China while playing around with his inventor neighbor's time machine. Desperately wanting to return home to such modern conveniences as cup noodles and the Super A'can, he sets out on a quest to find the demon that absconded with the time machine.

The localization process from Chinese to English was made very enjoyable for me, thanks to Yu-Chen Shih's effective translation and detailed notes, and due to the overall subject matter. Wukong's situation gave me the opportunity to write some modern day slang into his dialogue which would confuse the villagers, as well as place in some snappy pop culture references and jokes. Piggy, the man / pig hybrid, is constantly hungry - both for food and for women! I especially enjoyed writing some of his dialogue, and fans have commented on several occasions how much they look forward to controlling a pig character in an RPG. Then there's Wujing, who is filled with love and compassion but simultaneously experiencing anger and the sudden need for swift revenge. More warm and empathetic than the other two, she's directly concerned with the plight of the common man and less worried about personal gain.

Unlike with Beggar Prince, Legend of Wukong didn't present us with any daunting bugs. That was a real blessing, as it gave us all the time we needed to address and remedy any cosmetic problems we encountered, no matter how small, as well as enhance the game by adding new features. I could tell from my initial play through that, while the original game was certainly expansive and full featured, there was certainly room for improvement. Under my direction, much of the game's original code was either heavily modified or reprogrammed completely to suit our needs. In fact, I'd venture that we had changed about 30% of it when all was said and done. These changes ranged from vast improvements to the combat engine, to adding new magic, to tidying up certain graphics, and much, much more. In

CHASING THE CHUCKWAGON

- Dan Mahlendorf

Jumping on the Chuckwagon (or "Video Game Auctions Aren't Just for eBay Anymore")

When you hear the words "online" and "auction", what's the first thing that comes to mind? Except for the two smart-alecks in the back of the room screaming out "Ubid" or "Shopgoodwill", most likely the name "eBay" will pop into your head. As the largest auction site on the Web, we've all probably perused its virtual thrift tables for video games, memorabilia and a variety of other trinkets and doo-dads. As eBay has grown since its inception back in 1995, it was inevitable that some of the negatives one would find in real world would make its way into the virtual along with some hi-tech twists that can make the experienced shopper groan. High opening bids for 8-bit games you know are only worth two bits, auctions that have little information with sellers that offer even less, high shipping for items you know could be sent to you in an envelope with two stamps, finding items in sections that are fairly unrelated to what the item is...you get the idea. On the seller's side you've got ever-increasing fees and lots of options pushed down your throat that can nickel and dime you to diminished profits. Are there other options out there that can cater to an intrepid video game collector?

Well, gentle reader, "So Cal" Mike has your answer and it's personified in his video game auction site ChaseTheChuckwagon.com. Mike, a video gamer, collector and long time seller on eBay, was getting a bit fed up with the policy changes and the fee hikes that were happening at "Big Auction". Basing his site's name on a rare Atari game that helped inspire the concept of game collecting (as Chase The Chuckwagon is a "holy grail" among collectors), Mike set out to deliver a service that specialized in the auctioning of video games that didn't take a large chunk out of your cash box. Along the way, the fruits of his labor bore a strong online community along with an expanded selection of items beyond video games yet still connected to the collecting desires of the Chuckwagon's members.

So pull up a stump, grab a plate of biscuits n' beans and gather around the Chuckwagon to hear what Mike has to say about this amazing new venture.

VGT: At the time of this interview, you've got over 1,200 members and over \$45,000 sold. How's it feel?

Mike: Oh it's great, it's great. When I started, I was always very positive about the fact that I could create an auction site to go up against eBay. On [various gaming forums], everyone thought it was great idea but at the same time thought that it would never work. I tapped into the forums pretty heavily and it went over pretty well. People started signing up and the snowball started rolling and here we are eight months later with over

1,200 members. We're signing up about 150 people a month average.

Initially my goal was 2,500 people the first year. I'd be happy with 2,000...getting 1,000 is what web sites typically shoot for in a year, y'know, that don't have a big budget to push it. I think it's real encouraging that everybody's getting involved with it.

VGT: So what did it all take to create the auction site? Did you get any outside help at all or did you do this all yourself?

Mike: I didn't create the site myself but it's original software, it's not Pro-Bid Base or anything like that. It was actually created by a big sports card seller on eBay. He ended up getting sick of selling sports cards on eBay and started his own auction site. After a couple of years he thought "heck, why don't I sell the software that I created for myself?" I knew of him through a couple of associates and we had the site up and running in a week.

VGT: Wow!

Mike: Yeah! Start to finish. I was actually on a camping trip when it got set up, basically working with him on the phone and getting the categories set up. Literally it was probably less than a week-went from having no web site to pretty much the finished product. It's excellent software with a great backend and statistical package, it's just super.

VGT: Besides the technical aspects, what was it like on the business side? Was it pretty difficult, easy? Any roadblocks?

Mike: Not really. I was a big eBay user and I just kinda got sick of the fees and all of the ads and all the new formats they were pushing down my throat all the time. I just thought that the industry could support a dedicated auction site. I looked at eBay and figured they do about 300,000 video gaming auctions a day. So I thought, "Well, geez, that's unbelievable. Even if we did 1% of that it'd be a success."

So it just seemed to me that there was just no way, especially for the costs that I was able to start [the site] and the speed at which to get this going, there was just no way it could fail. And I'm not depending on it-I've got a real job that pays me well, I work out of a home office. It gives me a little bit of free time to work on things on

the side.

VG: Looking through the Chuckwagon's forums, you've got quite a community built up in a short time. Was the forum in the original plans or was it a "hey, this would be cool" type of idea?

Mike: The forums were an afterthought. I kinda thought that it was a great idea but was fighting with myself over the moderating...I've never run a forum before and I just heard horror stories but it turned out. I got hooked up with Vbulletin, who does the software for my forum as well as lots of other popular forums. It was a breeze and very cheap. It was one of those things where I made the decision to do it and within a day or two it was up and I launched it three or four months after the auction site started. The auction site had grown to about 600 to 800 members at that point and then when I launched the forums I sent an email out member-wide and asked them to join the forums. It turned out to be an excellent place for our members to mingle, get to know one another and get comfortable with the people they are buying and selling with.

So the forums were a tremendous idea. Turns out they're not that hard to police but lately I've been knocking about thirty spammers a day, so I kinda feel like we hit the big time, sort of. Judging by the number of spammers now from when it started, we must be out there someplace 'cause they're finding us.

VG: On the Coin-Op Live interview, the host asked, now I can't remember-was it a question on what the largest thing you've ever sold was or what was the rarest...

Mike: Most expensive item? Actually the most expensive item has changed I think since then, but I think it

was an "arranged" auction. The seller put up a prototype Atari, I think it was called a 2700, maybe? The guy put it up for like five grand and it sold in like 15 minutes. So I emailed him and asked "so what's going on?" and he said "Well, it was already a done deal but we just made it formal by listing it on the Chuckwagon." So I don't know if you can really count that one.

VG: Is that probably the rarest item you've seen?

Mike: That was probably one of the rarest items we've had. We've had a lot of "Chase the Chuckwagon" boxed

games go for \$300 to \$500, some pretty rare arcade games sell for a couple thousand.

I'd like to thank Mike for taking time out of his schedule for this interview. Be sure to visit <http://www.chasethechuckwagon.com> to check out the many great auctions that are listed. Also be sure to check out <http://www.videogametrader.com> for the complete interview!

Puzzle Piece Panic (Odyssey 2)

Designed by Ted Szczypiorski . Distributed by Packrat Video Games

**Available for \$24.95 at
www.PackRatVG.com**

Ah, welcome. Come, students. Enter, and be at peace.

The way of Zen is both difficult and simple. It can be achieved with years of mastery or with moments of focus on something like, say, a video game such as Tetris or Ted Szczypiorski's title for the venerable Odyssey 2: Puzzle Piece Panic.

Puzzle Piece Panic, as I'm sure you have deduced from the name, is a puzzle game. Admittedly, puzzle games can be counterintuitive for relaxation and Zen. There are the thrilling ones like Puyo Pop (still my personal favorite) and enjoyable ones like Chameleon, even though it is more about luck than anything. There are ones that are interesting but don't quite come together like Pac-Attack and there are those that redefine frustrating like Puzzle Quest.

I swear to God that game cheats...sorry, that wasn't a very Zen thing to say, was it?

PPP (Puzzle Piece Panic) is a clone of Tetris, which was truly a remarkable creation. It was a game whose concepts were stripped to the most fundamental elements with no fancy music, graphics or polygons. Just basic shapes and your ability to fit them together. Pure genius. Thanks to its simplistic design, many have ported clones of Tetris over to everything from the Atari 2600 to PC's running in Real Mode (kids, ask your parents about DOS and marvel at the primitive age). Now it's the Odyssey 2's turn to receive its version of this prestigious title but unfortunately the system has some limitations. Thankfully Szczypiorski was up to the task and PPP attempts to tackle those issues head on. And you know what? Mr. Szczypiorski pulled off an excellent version of the puzzle classic.

The drill is simple – fill in lines with blocks and the lines disappear as you try to keep the blocks from reaching

the top. And seriously, if you don't know about Tetris by now, scientists would love to learn how to get to the parallel dimension you slipped into.

The key to any puzzle game is control. You don't want players blaming the controls for their poor play. Likewise, graphics. Nothing infuriates a gamer more when a piece that looks like it would work in a situation doesn't (Puyo Pop on the Nokia N-Gage fails both of these). Puzzle Piece Panic keeps it straightforward. The control is crisp and responsive, so if you misplace a piece, it's your own fault and the graphics don't interfere with anything. So it's just you, turning the pieces and anticipating your next move and entering that realm of thought without thought.

Oh, by the way, if you want to show off what shouldn't be possible on the system, turn up the volume and listen to the music when your game is done. Not only are there a few different songs for the game-over music, it's also polyphonic sound, which I honestly didn't know the O2 was capable of doing. At first, I thought I was hearing things but sure enough the Odyssey was putting out some pretty nice tunes.

And so, students, if you wish to achieve Zen, you need to study and learn. This fun little game gets everything right that it needs to so go get a copy and dust off your O2. But please, keep the chanting to a minimum, okay?

Collectorz.com Game Collector

- Mick Case

As a video game collector you probably know that, when you have a sizable collection, it's sometimes difficult to keep track of all the cartridges, discs and such that you own. You could write everything down in a notebook, but what good is that when you have to make some additions to the middle of a list? A generic spreadsheet or database could be utilized, but that can take some time to get your data to come out the way you want it. Luckily, there is a software package out there that can help ease the pain of getting your collection straight: Game Collector by Collectorz.com.

In recent month, the newest version of Game Collector software, 3.0 build 3, was released to the public. It is a relatively small file (8035 kb) and operates on most versions (98/XP/Vista) of Windows. It is a quick and painless install and the software does not contain any adware or spyware, so it respects your computer and your privacy. Once installed, it responds quickly to tasks assigned. However, as your collection grows and your database becomes HUGE, its performance does start to chug a bit. As we all know, any respectable collector will admit guilt in trying to maximize their collection! It is for exactly this reason that this program exists.

Let me start by saying that Collectorz.com Game Collector software does a great many things right. It is very similar to the other Collectorz management software titles such as Movie Collector, Book Collector, Music Collector and MP3 Collector. Game Collector does exactly what you would expect it to do: help one to archive their video game collections. As intended, the software seems to be geared to the serious collector with hundreds of items in his/her personal collection. I personally have over 10,000+ games in my individual collection, so I gave it one heck of a run for its money! Even with such a MASSIVE library, the program never once froze up or crashed. This reveals exactly how stable Game Collector really is and its programmers should be commended.

While the program includes a database for most gaming platforms, it is far from complete and lacks some basic, yet expected, functionality. For instance, you would think that the program would list all games available for a certain platform. It does not. In a perfect world, an alphabetical listing of all games for a platform would be generated so that the user could simply check off which

games are present in the collection.

Figuring that such a necessary function could not possibly be absent, I contacted Collectorz's tech support. They were quick to respond and answered all of my questions. Unfortunately, the answers I received were not what I wanted to hear. When I questioned the spokesperson for Collectorz about generating a listing of releases by system, I received this response: "I understand why this would be useful to you, but I must say that not being able to do so is in fact "by design". Allowing users to download our full lists would make it very easy for competitors to 'leech' our entire database." This response is ludicrous. Full system release lists have been listed online on dozens of websites such as Digital Press and Good Deal Games for years, long before Collectorz ever entered the scene. Heck, this very issue of Video Game Trader itself contains a full game listing for most systems and does so every issue.

Since the "easy way" was no longer an option, I decided to type in all game titles manually. This process was extremely time consuming. I spent just over four hours entering my 574 PS2 games into my personal database. A checklist could have done the job in less than twenty minutes. At this point I should mention that Collectorz does offer another option for entering data. They conveniently sell very expensive scanners that will recognize UPC barcodes. You can either add a basic swiping scanner for an additional \$49.95 or \$159.95 will get you a deluxe laser scanner. I suspect that such a maneuver was done "by design" in order to sell more costly scanners rather than to allow the data input chore to become easier for the user. With that said, the scanner technology is responsive and works well.

However, even with the implementation of either scanner device, loose games in your collection still have to be

individually entered via keyboard, as they contain no UPC barcode. So, we are back to square one with the time consuming process of data entry rather than using the absent master list option. Concerning the master list, while looking through the software I found hundreds of titles in the database that do not exist. Perhaps taken from product announcements of long cancelled software, this software's database is full of vaporware. Many titles are listed multiple times with minor variations, such as the game 'Made Man' also registered as 'MadeMan.' These fictional titles and double listings could also be another reason why they do not allow full lists. If they simply took a minimal amount of time to compare their database to others, they could solve many inaccuracies in a single day.

Overall the software does a good job concerning the major consoles. If you're primarily into the mainstream, you'll have no problem navigating and archiving your collections for Nintendo, Sega, Sony and Microsoft platforms. However, Collectorz is gearing this for the serious collector. While the software covers platforms such as the NEC PC-FX, which has less than seventy titles, it unfortunately has only eight listed in the archive. Because the PC-FX's catalog is rather small, you would think that the archive would be complete. The Nuon only had eight games released, but Game Collector only archives the single title of Iron Soldier. Listing a single item from a category that only has eight releases is simply sloppy.

Now the above examples are fairly obscure systems, but Collectorz covers much more obscure systems such as SHG Blackpoint and the XAVIX. It even covers the Dreamcast Visual Memory Unit, which had no physical releases! Other obscure systems such as Action Max or the Tiger Game.Com are completely absent. To be fair, there are dozens upon dozens of platforms and the undertaking for the software was huge. However, within just a few hours, I found so many inaccuracies that it is hard to be forgiving.

On a more positive note, while it is labor intensive to enter all of your personal games, the software does do a fantastic job at filling in all the blanks. Meaning, you give a system and a title and it will supply an enormous

amount of additional data such as publisher, developer, genre, year published along with over 70 other additional choices. It goes beyond supplying boring text lists by displaying a multitude of images like box artwork. It is fully customizable, showing only what you deem to be important in a very professional and visually attractive layout. This feature alone is worth the price of admission!

A feature that I was not expecting to find in Game Collector, that turned out to be quite functional, was the loan tracking features. You can flag any game that you loan to a friend, date stamp it, and even have it prompt you after a certain time if it is not registered as being returned. This feature is simply a good idea. As a result, I'll never accidentally "give" out a free game again!

Also, like other Collectorz.com software, your entire collection is mobile. You can export your data to several formats (HTML, CSV or XML) for yourself or others to view online, print a physical hard-copy list or even transfer it to external devices such as an iPod. As a result, you will never be caught "out in the wild" unprepared!

If you are reading this review, you can already communicate in the programs native language of English. However, if you do prefer another dialect, Game Collector is available in eight other languages.

Want to try it for yourself? You can download a sample version of the software for free at <http://www.collectorz.com/game/>. The trial version will allow you to enter up to 50 entries into a database and will function for a month.

While there are not many other options, if you have a large game collection and need a reliable software solution to archive them, then Collectorz Game Collector REALLY is your BEST option. Despite its drawbacks, it does the job better than any of its competitors, and that alone says a lot.

ColdGuy

For those who are unfamiliar with Game Battles here are the basic rules: games that are somewhat linked to one another are chosen. These games then enter into combat, "Thunderdome" style, to determine which one is better. There are 7 different criteria that these games go through: Graphics/Animation, Gameplay, Sound/Music, Challenge, Controls and a final wildcard category that could be anything. Each category has a 1-5 star rating with the exception of the wildcard category where the points are doubled. At the end of it all the points are tabulated and a winner is decided. All decisions are final so don't complain to me that your game lost. Suck it up, this is a Game Battle!

The Thunderdome has seen many games of the past go at it for supremacy but today we have an interesting twist for the latest match up. This call for battle is something that even I did not see coming: a 3-way match to determine which Kirby game is the best for the SNES. This conflict is intriguing enough to warrant the attention it deserves, so enter into the ring "Kirby's Dream Course", "Kirby Super Star" and "Kirby Dreamland 3". This is Game Battle!

Round 1: Graphics/Animation

Out of the three games in the ring, two of them share a graphical style. "Super Star" and "Dream Course" are similar in regards to the way enemies and backgrounds look. While the backgrounds may be enhanced in "Super Star", "Dream Course" counters that with the subtle textures in its foreground landscape to help determine exactly how steep a hill is. What makes "Dreamland 3" different from the others is that it has hand drawn sprites. The attention to detail in it is absolutely amazing and was something that was not even attempted in the later days of the Super Nintendo. It is visually stunning to see this on a 16-bit system and "Dreamland 3" easily takes the round.

Dream Course 3/5 Superstar 3/5 Dreamland 5/5

Round 2: Gameplay

Now I am going to assume you all have played a Kirby

game at some point, but for those who have not here is a quick rundown. It is a simple platformer where you attack enemies by eating them and while they are in Kirby's mouth you can either spit them back out as a projectile or swallow them to copy their combat abilities. "Dreamland 3" has this simple

concept but adds some friends into the mix who allow you to ride them to the end of the level. Depending on what you do at the end of the level you can receive a heart from an NPC, which helps you get the best ending. In "Super Star" it does not have this task-based approach but instead has 6 different platforming modes. For example one moment you are playing to get to the end of the level while the next has you searching various rooms for treasure chests. It also has a racing, arena and a few mini-games to round out the selection to the title.

"Dream Course" is another game in itself as it sheds the platforming and goes to golf. The objective is to get the lowest score on each "hole" by hitting enemies. Hitting certain enemies will let you take their power which will either help or hinder you depending on when you use the abilities and where. For a golf game this is pretty innovative, going out on a far limb to try something different. However the winner has to go to "Super Star" for giving you a variety of ways to pick and choose your Kirby experience.

Dream Course 3.5/5 Superstar 4/5 Dreamland 3/5

Round 3: Sound/Music

When you think of a Kirby game, its catchy music always comes to mind. It is a trend that has continued from its inception back on the Game Boy with tunes that could drive anyone into madness when placed on a never ending loop for days on end (you do not want to know

how I know that). These games are no different. "Dream Course" has causal music that you can easily bob your head too, "Super Star" goes for more atmosphere which drives you to go from place to place and "Dreamland 3" makes you want to revisit stages again and again just to hear the soundtrack to each level. The nod goes to "Dreamland 3" since its tracks are vast and unique enough to be above the mold that was created in past titles.

Dream Course 3/5 Superstar 3.5/5 Dreamland 4/5

Round 4: Story

Now when it comes to story...Kirby is lacking. I mean usually it is get to end of world, defeat boss, repeat 6 times, defeat final boss, congratulations! These are no different. In "Dream Course" it is get to the final hole and beat Dedede while in "Super Star" you have to beat the games until you get to 100%. "Dreamland", however, tried something different. Although it is not a real story, its opening cinematic is about some unknown black thing flying down from the sky while all the characters look at it with despair. The friends of Dreamland then get together to

pose for the title screen and kick out whatever the black thing is. In an attempt to be different, the story is not so good but is just barely better than the other two...barely.

Dream Course 1/5
Superstar 1/5

Dreamland 2/5

Round 5: Challenge

Normally you do not associate Kirby with a challenge and although the later levels can be more difficult, they typically go toward the easy end of the gaming spectrum. Now how do these three games compare? Well I still have never seen anyone beat "Dream Course" without cheating or looking up a FAQ, "Super Star" is a tough one to get 100% in (especially in its Arena mode) and "Dreamland" will drive you up a wall as you try to get the best ending by making everyone happy at the end of each level. So who wins out? This is going to have to go to "Dream Course" as it takes more skill to make the least amount of shots every single time while the other two games can be figured out after some trial and error.

Dream Course 4/5 Superstar 3/5 Dreamland 3/5

Round 6: Controls

These games all have controls that are tight and are just right to play, so to say one is better than the other is really difficult. However the nod has to go with "Dream Course" since you are required to press a certain button at EXACTLY the correct time in order to be able to achieve the best outcome on the hole.

Dream Course 3.5/5 Superstar 3/5 Dreamland 3/5

Round 7: Best Multiplayer

Here is the wildcard and it is going to be needed to determine the winner of this battle. Simply put, which game is best to play with a friend? Kirby games are usually solo experiences, however these three games beat out the pack by adding a second player into the mix. In "Dream Course" you can go against yellow Kirby to determine what color Kirby should really be by capturing stars while playing in a round. In both "Super Star" and "Dreamland" you can play Co-op with Kirby as a helper who can collect powerups and beat up on some enemies. The only real difference between these two are "Super Star's" minigames, which allow a little competition to be had between players. There are different minigames to choose from, including one to determine which person can crack the world in half!

So who is the winner of this round? "Dream Course"! Although you and a friend can marathon to beat the game together, it is nothing compared to the aggravation of your opponent pulling off a super star shot to undo your last move and win the game. The pure act of completion keeps you coming back for more and more, so "Dream Course" gets double the points.

Dream Course 4/5 Superstar 3.5/5 Dreamland 3/5

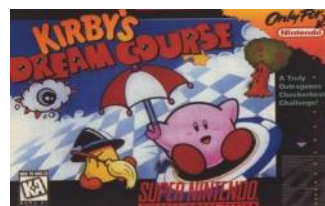

Final Totals:

Dream Course 26.5/40

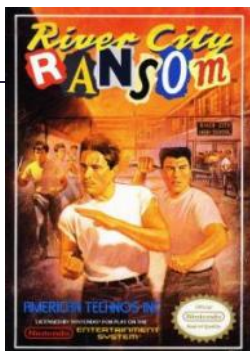

Superstar 24.5/40

Dreamland 25.5/40

We have a winner and it is "Kirby's Dream Course"! I hope you all enjoyed this battle and realize that even the

simplest of games can have tough challenges. Until next time this is Game Battle!

River City Ransom Grade: B

- Agent J & K

In 1986 Technos released a landmark game in Japan called Renegade. This was the first real beat 'em up game on the NES. It introduced us to being able to walk in any direction, dueling it out with bad guys that take multiple hits to kill and the idea that only two bad guys

can be on the screen with you. Renegade was a decently popular game and paved the way for Technos' most successful game: Double Dragon. While the Double Dragon series was clearly Technos' big money-maker in the United States, its other main series dubbed the "Downtown Nekketsu" series was very successful in Japan and has rapidly grown in stature in the United States as well.

River City Ransom is the third game in the Downtown Nekketsu series. One major improvement over Renegade in the gameplay arena is that River City Ransom is a two-player simultaneous beat 'em up.

The game's plot itself is pretty standard; you have to save your girlfriend who has been kidnapped by some evil dudes. Over the years River City Ransom has grown to be a major cult classic due to all of its interesting features. While containing many of the standard beat 'em up elements of Renegade and Double Dragon, this game introduces some very unique features such as the ability to collect money from every bully you defeat and then spend this money on a variety of goodies at the store. You can buy anything from sushi to porno mags to books that teach you ancient fighting techniques. You also have to pay attention to in-game dialogue to know where to go next and must navigate your way through town to find all of the bosses. You almost assuredly will find yourself hopelessly lost in this game and under-matched for the final bosses if you haven't properly pumped up your skills at the town shops, which gives this game a little bit of an RPG feel.

Positives: This beat 'em up is the king of options. You

can buy so many different items that you need a list to figure them out. You can power up many different attributes and purchase books to learn different fighting techniques, just don't throw your book away once you've learned the technique because it will be gone (ahem, Agent J). The game is non-linear to some degree allowing you to visit many different areas though some bosses must be beaten to unlock other bosses. Upon defeating enemies they shout humorous responses such as "Barf!" and "Dude I'm history!" Two-player mode is fun with many options such as hurling your buddy at the baddies or if your partner angers you, go ahead and pound 'em (using stone hands leads to quick death). There are many items that can be picked up such as baseball bats, trashcans, and rocks.

Glaring Negatives: The greatest problem is that the game is confusing. River City Ransom seems easy and straightforward. Kill baddies and then move to the next screen and kill more. Eventually you will reach your final destination – your rival high school containing Slick. However, you will not be able to enter and you'll wonder why the heck not! In order to enter the school you have to kill certain enemies in a specific order often backtracking to areas you thought were already beaten. Some bosses give clues where the next boss can be found but often times you are not sure where to go next. There are also so many items that it is difficult to know what you should buy. For instance the hyper ball which costs 57.50 (which is a ton) sounds amazing. Perhaps you can hurl a ball which bounces around and kills everyone, but alas it does not. Instead it powers up your stamina and other stats but nothing too special. When you run low on health buying items can be a crapshoot until you figure out which ones actually restore health. The password is notorious for not working because many letters look similar; surely you've encountered this problem before from games like Metroid. Another annoying "feature" is that often you will injure yourself by running into walls or areas which look like they lead to the next screen but in fact do not and are apparently invisible walls. This hurts more than just your ego and takes away a decent amount of your health. It is unfortunate that there is no option in the two-player mode to prevent you from hurting your teammate (which is very frustrat-

Tips and Tricks

- Recharge is an excellent item for refilling your stamina (health).
- You lose half your money if you die so be careful.
- In 2-player mode, if

one of you dies, the other should leave the area. This will allow the dead player to reappear.

- You can only increase your max power if you have full stamina when you use an item.
- Buy the technique

Grand Slam as it allows you to swing that bat wildly.

- Special music will play when a boss has entered the area.
- After defeating a boss pay close attention to his comments.

ing since it was available in the Japanese version).

Graphics and Sound: Solid

Throughout the game you will make your way through different forests, streets and towns. Each place is different enough to be interesting but none of them feature stand-out graphics. The color scheme is a little dull and the characters are strangely square-like (a trademark of virtually every Technos release). The music is fine, nothing terribly memorable but nothing annoying either.

Gameplay and Controls: Tight with a twist

The controls for the most part are great. There are lots of different maneuvers you can pull off when beating up the baddies and your guy easily does what you want him to do. There are a couple minor annoyances though. One is that there are a couple spots where you have to land a precision jump, which may take a handful of tries. The main example of this is that you have to land on a basketball hoop to move on when you are in the high school gym. Luckily, none of these jumps lead to a death if you screw them up. It is also annoying that your guy runs if you tap forward twice because sometimes you will be trying to walk precisely and end up running off a ledge.

Features: Tons

The enormous number of features is what separates River City Ransom from all other beat 'em ups. You can buy different techniques, footwear, books, candy,

burgers, and many other helpful items to improve any of your numerous attributes. These items are bought with coins which are gathered from the rotting corpses of your opponents, each gang giving a different amount. The password feature is also nice and allows you to come back for more later (if you can actually get your password to work, which we were not able to achieve).

Fun?: Pretty good one-player, Better two-player

You will definitely have fun playing River City Ransom by yourself but the game is more fun with a second player. You'll have a second brain to help figure out where to go when you are lost and you will have someone to beat up when you get frustrated.

Challenge: Medium

Without a FAQ you may find yourself frustrated because you have no idea where to find the bosses. It can also be tough to know which items to buy. The fights themselves are relatively easy until you reach the last two bosses. With enough power-ups they are easy to dispatch as well.

Replay: Some

There is quite a bit of replay here if you enjoy River City Ransom. Each attribute can be powered to 63 and there are a large variety of expensive items to acquire. While the bosses will always be the same there are also two levels of difficulty and you can try to beat the bosses with low attributes for an even greater challenge.

2 Player: Boo Yah

Two-player is where this game really shines. Are you in the mood to be co-operative? Fine. Are you in the mood to hoard coins and "accidentally" punch your buddy in the face? Well that's fine too.

Bottom Line: Get it

If you heard and believed the hype that this is one of the greatest NES games of all time, you may be disappointed. If you are looking for an entertaining, option-loaded, two-player simultaneous beat 'em up you are in business.

PRICE GUIDE INTRODUCTION

ATARI 2600

Welcome to Video Game Trader's Price Guide. Our values reflect what you should expect to pay for an item on the open market. Please remember that we are human. If you see a common game for \$400 or a rarity for \$1, please let us know. It's probably just a mistake.

How to read the guide

If we have updated or changed a price you will see a "+" or a "-" next to the price for each item. "+" indicates a price increase, while "-" indicates a price decrease. An "[HB]" designation next to a game means that this title is a HomeBrew game. We may list prices for complete games (**CIB** - Games with original case, manual and any maps), game only (**Loose** - cartridge or cd only), or both may appear in the listing.

All prices assume that the games are clean (no rental stickers or markings). For complete games, it is assumed that all contents are clean and free of markings. This guide reflects **USED/PREOWNED** games only. It also does NOT reflect "Graded" games/systems (please see our special section for these types of items).

We are always looking for help, if you think you can be a valuable resource for the price guide, please contact us at vgtnj@aol.com

MADTRONIX 3D IMAGER (VECTREX)

- P. Ian. Nicholson

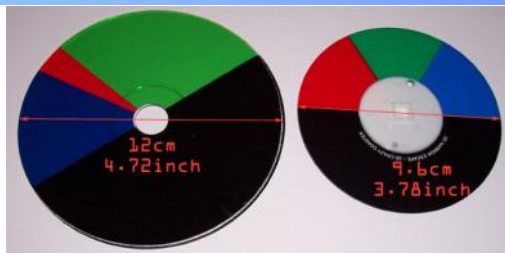

As any video game collector will tell you, the Vectrex vector-based game system and its accessories have always maintained a moderate selling price through the years. The system alone usually commands prices of around \$100 and the typically harder-to-find peripherals sometimes go for a lot more. One peripheral particularly sought after by Vectrex collectors is the Milton Bradley (MB) 3-D Imager. Released in 1983, along with the games 3-D MineStorm, Narrow Escape and Crazy Coaster, it offered the possibility of playing games both in colour and in 3-D. Unfortunately, the MB 3-D imager was only sold in small quantities (not helped by the Video game crash of 1984 and the phasing out of the Vectrex) and never reached countries outside the USA. As such, for some international collectors, ownership of the MB 3-D imager has become somewhat like the quest for the Holy Grail. When MB 3-D imagers do occasionally appear on internet auction websites, it is not unusual to see them fetch prices in the range of \$550-\$1000 depending on condition and if the original packaging is included.

Original Milton Bradley 3-D Imager

Where does that leave us Vectrex gamers with more modest sized wallets who want to try out the 3-D imager technology? Well, there are detailed instructions available on the internet showing how to construct 3-D imagers, but it takes time and resources that not everyone has available. A far better option is to purchase a 3-D imager from "homebrew" manufacturer Madtronix, who builds their 3-D Imagers in batches. You won't hear from them for a long while, and then suddenly on their website shop are six 3-D Imager products for sale. This article is a review of Madtronix's 3-D imager.

Before going any further, it's worth explaining how the MB 3-D imager works and how Madtronix's 3-D imager differs from the original. The 3-D imaging and colour technology works by spinning a translucent and opaque multi coloured wheel between the user's line of sight and the Vectrex display. This technology was not new in 1983 as aspects of this had already been applied in the late 50's in attempts to provide black and white televisions with cheap colour. This particular embodiment of the technology for the Vectrex represented the first 3-D

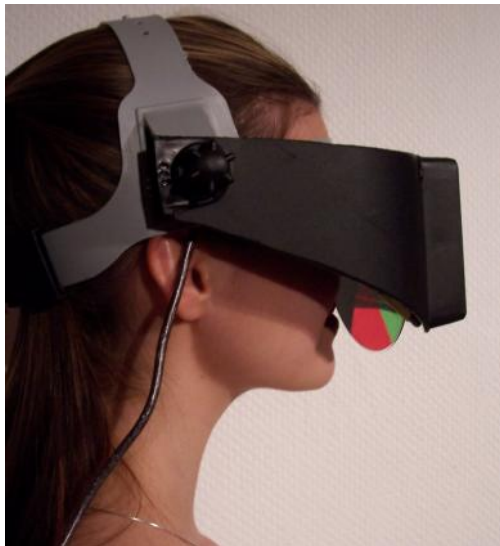

Size of the Madtronix colour wheel compared to the original MB colour wheel

glasses specifically for use with a video gaming system. The spinning wheel comprises of four segments of colour: translucent segments of red, green, and blue and an opaque segment of black. As the wheel spins, each colour sequentially covers the left and right eye repeatedly. A small hole positioned on the wheel and sensed by an infrared transmitter and detector is used to tell the Vectrex how fast the wheel is spinning. The motor spinning the wheel is directly under the control of the Vectrex. When the Vectrex draws an image on its screen it is in synchronisation with the colours of the spinning wheel as they successively go past the user's eyes. The timing and length of time an image is present on the screen dictates the colour perceived by the user. Similarly for 3-D images, it is arranged by the program running on the Vectrex, for objects drawn on the screen to appear at different times to the left and right eyes. The colour wheel in the 3-D imager is spun at approximately 1,620 RPM, although the speed can be changed by the Vectrex game to accommodate different colour hues. With the wheel spinning around fast enough, the player's eyes and brain are tricked into thinking that the multiple images are two different views of the same object that leads to the impression of 3-D.

The Madtronix 3-D imager uses the same technology but with subtle technical differences. The most noticeable difference is that the colour wheels are 12 cm in diameter as opposed to the 9.6 cm diameter of the original MB 3-D imager wheels. This has the advantage that it allows improved viewing as the viewing range is bigger. The other main difference is that instead of a synchronisation hole on the colour wheel there is now a sticker. The infrared transmitter and receiver, located respectively on each side of the wheel with the MB unit, are now on just one side. The infrared beam is then bounced off the sticker to indicate position. This is probably done for reasons of manufacture. If the position of the synchronising hole is just a degree off of the correct position, poor 3-D and colour imaging results. Home brewers don't always have sophisticated manufacturing equipment. Using a sticker allows Madtronix to correctly position the synchronisation mark during manufacture – unlike a hole, a sticker can be easily moved after testing to ensure optimum viewing quality.

The overall physical design of the Madtronix 3-D imager is based on a modified welding mask, which works really well and is more practical to wear than the original MB 3-D Imager. Different shaped heads can be easily and quickly accommodated through an adjustable hand screw. Prescription spectacle wearers are not disadvan-

tagged either as they can wear both spectacles and the 3-D imager at the same time. A flip-up visor mechanism is also incorporated in the imager, allowing the spinning wheel to be easily pivoted away from the user's line of sight so they can see normally without having to remove

Madtronix 3-D Imager (and a girl)

the imager from the head.

Like the MB 3-D imager, the Madtronix imager plugs into the second joystick controller port connector on the Vectrex. When initially plugging in the 3-D Imager and switching on the Vectrex, not a lot happens. Booting into the game, though, can be quite worrying for the uninitiated. All of a sudden the motor of the 3-D imager powers up and the wheel begins to spin at higher and higher RPMs accompanied by a mechanical whirling sound. At this stage, those with well-endowed noses might become a bit concerned. Unlike the official 3-D imager where the coloured wheel is fully enclosed, on the Madtronix design it is exposed and one's nose is approximately half an inch from the spinning wheel. However, there's no need to worry. Since the design is based on a welding mask and the imager is of sturdy construction, the space between the wheel and the nose remains constant. When removing the mask during a game, either flip up the visor or better still turn off the power before removing the imager from your head – in that way both your nose, fingers and colour wheel are saved from accidental damage. At the start of a game, the speed of the spinning wheel is ramped up high so that it gets its speed up quickly. Once the optimum speed has been reached, the noise reduces and the user soon forgets about this sound during game play. This effect is identical with that of the MB 3-D imager.

In operation the 3-D imager performs as good as the original MB 3-D Imager. With the 3-D imager in action you really feel submerged in the 3-D games. You will need the three officially released 3-D games cartridges (3-D MineStorm, Narrow Escape and Crazy Coaster), as the Madtronix 3-D imager is not supplied with any

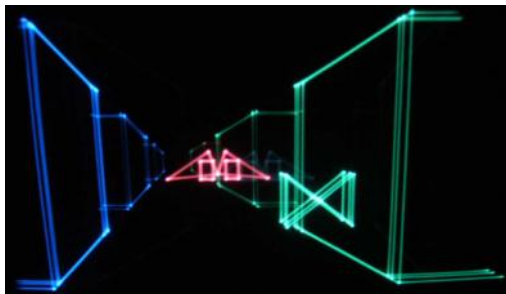

games. Fortunately, Madtronix has all of these games available for sale on one cartridge. Alternatively, the binaries are available on multi-carts and are also available for download from a number of websites. The 3-D imager does come with two different colour wheels: one specifically for 3-D MineStorm and another wheel for Narrow Escape and Crazy Coaster. This mimics the situation for the MB 3-D imager where the respective cartridges were supplied with different colour wheels.

One thing that should be mentioned about this technology is that a small percentage of people may not see the 3-D and colour effects to the same level that the vast majority will. Some also claim that they get headaches when using a 3-D imager. For the purposes of this article I spent several hours playing the 3-D games with the Madtronix Imager, typically playing the games in half hour bursts. After half an hour of game play I would remove the imager and do something else then come back and have another go for another half an hour. I am pleased to say I did not suffer any ill effects.

While this article is a review of the imager rather than the games, a quick mention of the games and their game play is worthwhile. I enjoyed playing 3-D MineStorm the most, followed by Narrow Escape. In 3-D MineStorm the 3-D representation is excellent and fully justifies a 3-D Imager purchase. With Narrow Escape, the 3-D effect is not so effective and there appears to be some double imaging. This is an original issue with the MB 3-D imager as well and probably also depends on the person. For me Crazy Coaster was the most disappointing of the games, not so much for the 3-D effects but rather the lack of game play.

There are a couple of other games/demos available (3-D Lord of the Robots and Sledge 3-D) but I did not have access to these. 3-D Lord of the Robots is a modern homebrew by Fury Unlimited and has been reported as one of the best 3-D games available that shows off the true 3-D capabilities in the best way possible. Unfortunately on Fury's website it states that the cartridges have sold out – but you never know they may just become available again or perhaps one will appear on an auction website. Some good news though is that Fury is working on a new 3-D game called 3-D Sector X.

In the original advertising for the MB 3-D imager, men-

Narrow Escape (as viewed with the 3-D imager). Of course what can't be captured in this picture is the sense of being in the game, with objects flying into the player's face and behind their head.

(Continued on page 48)

tion was made of a 3-D version of Pole Position. To date no fully working prototype is known to exist. It's worth mentioning that there is a binary claiming to be 3-D Pole Position which can be found on some multi-carts, but this one does not function beyond the initial start screen.

The Madtronix 3-D imager must also be the only Vectrex peripheral to have an interface cable length greater than 1.5 m. The original MB 3-D imager had a relatively short cable, which caused complaints of double imaging. The Vectrex FAQ states that sitting further away from the Vectrex screen gives an improvement to the image quality, which the long lead of the Madtronix imager can help facilitate.

It should be noted that the Madtronix 3-D imager has been around for a few years. The first imagers were developed in late 2005 but were plagued by unsatisfac-

tory colour wheels. In 2008 a second generation of 3-D imager was released along with a fourth generation of colour wheels. The current product represents the state of the art and is technically mature. For those owners of earlier 3-D imagers, Madtronix has kindly offered to supply as a replacement the current colour wheels if the earlier generation ones are returned.

All in all, the Madtronix 3-D imager is an interesting product. It allows the user to play 3-D colour games just as well as the original MB 3-D imager but at a significantly cheaper cost. For the Vectrex fan who enjoys new experiences I would recommend this product.

In fact if anybody is lucky enough to own the original 3-D imager and still wants to enjoy 3-D Vectrex games, it is probably preferable and more sensible to leave the MB imager safely in its box and wear out the Madtronix imager instead!

(Continued from page 11 - **Legend of Wukong**)

this regard, working on Legend of Wukong was a lot like a "do it yourself" renovation project: We had no source code to work with so our programmer had to study the original routines very closely. We were building many new things onto an existing frame in the hopes of ending up with the perfect product. When I think about the project this way, it makes me even more proud of what we accomplished. Thus, while some people may choose to improperly classify the work we have done as, simply, the localization of a Chinese videogame, it was, truly, an intensely difficult and extensive job - but we made it our own, we wrapped it in our care.

Legend of Wukong's story spans six big chapters, each being packed with unique situations, enemies, puzzles and humor. As players make their way through the adventure, they are given the option to save their progress to any one of the game's three save slots. Saved games will be important, because in this game there's danger lurking everywhere in the form of nasty demon lords and their gruesome servants, and the battles are intense!

During their quest, Wukong and his friends will have to survive such plights as a soul devouring lich, a land engulfed in flames, a troop of devious spider sisters and a great deal more. Thankfully, each of the heroes will come to wield the power of both helpful magic and powerful weapons throughout their travels; and even though many of the people that the trio runs across will seem downbeat and helpless about the state of their world, others will step up to provide crucial clues and assistance. Through it all, the powerful ties of friendship will hold the group together even in their darkest moments, making them a serious threat to the forces of evil.

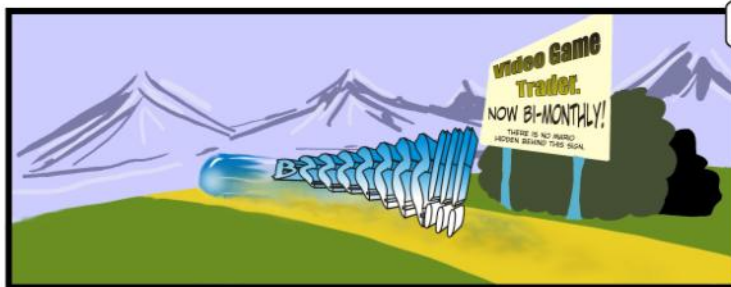

When it comes to the presentation of the product, we've retained and even improved upon the high quality pro-

duction values that were first brought to the table with Beggar Prince. The game ships on a cartridge along with a full color 16 page instruction manual, complete in its own authentic plastic clam shell case with full color insert. As well, the quality of our plastic clam shell cases has improved, keeping in line with our undying focus on delivering only the best product possible.

Legend of Wukong is region free and can be played and enjoyed on all Sega Genesis and Megadrive systems, compatibles and clones. This, of course, includes full compatibility with system upgrades like the 32X and Sega CD, and hybrid systems like the CDX and X'Eye. Originally developed by our friends at Gamtec in Taiwan and significantly enhanced and improved for proper worldwide release by our dedicated team, the game is now available for \$40 + shipping. I invite you to visit the game's official website at www.legendofwukong.com and have look for yourself. Have a great time, and never let dreams die!

GAME OVER...

- Michael Rosamilla

CONTINUE?

Anyone who keeps ear toward the industry knows that sex is a hot topic for video games. Brenda Brathwaite, for example, has in the past vocalized her desire to see more sex in games. But despite the allegations that games should be considered on equal footing as film, comics, etc. regarding sexual content, nobody has taken the time to address the obvious differences between games and other mediums and how that affects sexual content within.

Sexually explicit video games are nothing new. Custer's Revenge, anyone? We all know the "plot" of that game. But whether you're a fan or are offended by it, one thing stands out above everything else. I'm talking about the graphics. It's the 2600, for crying out loud. This is what I find so amusing about the situation. These things on screen barely look human at all. There is a reason why most vintage games involved simple space-ships and random blocks. Drawing people was hard! So, here's the \$65,000 question. What purpose did sexually explicit vintage games serve? Presumably, pornography serves to arouse. Even non-pornographic sexual situations often have at least some enticing purpose in film and other mediums. Hell, the producers of Die Hard are on record as having been slightly miffed that the movie didn't have any sex. And this is Die Hard. The only major female character is McClane's wife, Holly. And we all know he's not getting any sex from her. But, point taken. Sex can be a strong selling point in film. But does this carry over to video games? Is Custer's Revenge enticing in the least? I don't think I'd be challenged if I said no. So perhaps sex in games originated as more of an in-joke than anything else. Maybe that can change, though. Games have come a long way from the single screen antics of tiny sprites. Or have they?

There is one thing that few people are taking into account in this debate. A video game is by nature an interactive experience. The player is

not asked to just watch something. That might be one aspect but at the core of a game is a request that the player do something. Player, will you save the princess? You don't ask that of a moviegoer. Moviegoer, will you throw Hans Gruber out a window? That doesn't make any sense. When I watch a movie I'm just there for the ride while someone else drives. I am not suggesting that video games cannot have a cinematic element. They can. But, sex in the cinematic portions of a game defeats the purpose of saying that games need more sex. Then all you're doing is putting sex into a movie that happens to be part of a game. The reason sex has a problem sitting comfortably in games is because most video games need a target goal, even if it is simply earn-

me how long I have to wait before I can play again."

Interactivity is a big deal. Sex is different than violence from an interactive perspective. I would contend that violence and video games mix. Usually, in a game that relies on violence, the player is charged with stopping (or being) the bad guy. Regardless of what side of the law your virtual avatar is on, however, there is often an antagonist and the conflict is what moves the plot along. Violence is the tool but it isn't the endgame. It's the means to an end. You stop the bad guy by shooting him. Likewise, it is a natural method of interactivity. The A button punches. The B button shoots. It makes sense. But now think of a tasteful sex scene from a movie.

You know, one that isn't pornographic but serves the plot. My best example would be John Connor's conception in The Terminator. Tastefully done. Now imagine that same scene in a video game. Don't cheat. Don't imagine it as just a cutscene. Fit it into the gameplay.

See the problem here? It's kind of hard to keep the scene as tasteful as originally envisioned when you are actually pushing the button to make it happen. Not to mention, it also comes off as slightly silly when considering the graphical capabilities of any game pre-Unreal 3. Anyone want to push the A button and watch a little squashed sprite thrust his way into another little squashed sprite? But besides the silly nature of something like that, even if using highly advanced graphical technology it comes off as kind of sad. We all know that blow up dolls exist but few people proudly declare that they use them. I would say that sex in video games is less like sex in film and more like blow up dolls. Interactive toys. And for that reason, finding a comfortable place for sex in this medium is just harder to do without either interrupting gameplay or coming off as sleazy.

ing the high score. In most cases, sex is an interlude that prevents the player from moving forward toward a goal. And one thing about gamers that's pretty consistent is that they hate when a game's pacing is chosen for them. They like to be able to hold down a run button. They like to be able to escape from battle. The mindset is, "I'm in charge. Don't tell
